

SCIGRIP secures multiple high volume sales with top European marine manufacturers

23rd February 2017, Washington, UK (Hall 5a, Booth C21) - SCIGRIP, a global supplier of smarter adhesive solutions, is reporting a strong and impressive start to 2017. Following a number of successful trials in boat yards across Europe, the company has secured a significant number of high volume orders with leading sail, power and leisure boat manufacturers. SCIGRIP attributes this latest success to the growing popularity of their industry approved methacrylate (MMA) adhesive systems and the ability to produce and dispense the products rapidly in bulk quantities.

MMA's for marine applications

SCIGRIP's SG230 HV is a well-established system that holds both Lloyd's Registry and American Bureau of Shipping (ABS) certifications. It is a two-component, 10:1 mix ratio product for bonding composite and other plastic parts with little or no surface preparation. SG230 features excellent fatigue and vibration resistance for key structural areas and can bond to metal structures with a simple priming process. The company reports that marine manufacturers are particularly pleased with SG230 HV's results and performance in hull to deck bonding and stringer to hull bonding.

Another key marine MMA product offering is SG300. This adhesive is ideal for internal and external bonding requirements and very effectively joins metals, metals to plastics, and metals to composites, replacing or reducing the need for mechanical fasteners. SG300 also demonstrates excellent environmental and chemical resistance making it a robust choice for marine applications.

Arjay bonding compounds

Following their acquisition of Arjay Technologies Incorporated in 2016, SCIGRIP is now able to supply an extensive range of performance bonding compounds for the composites industry that offer strong and supremely versatile assembly solutions. Key products suitable for marine applications include; 7121 Vinyl

Ester Compound, 5121 Premium Radius Compound and 2121 Radius Compound. These products also perform exceptionally well in the transportation market.

Bulk dispensing capabilities

Thanks to Magnum Venus Products International's (MVP) mixing and bulk dispensing equipment, SCIGRIP is able to efficiently supply MMA products in large format bulk packaging. MVP serves the needs of the growing composite market and specialises in pumping systems and accessories for closed and open moulding technology.

Technical demonstrations at JEC World 2017 (14th- 16th March)

At JEC World, SCIGRIP is participating in a series of technical demonstrations with MVP. Visitors are invited to observe the infusion of a 1 person Oaussou kayak proceeded by the bonding of the vessels' parts using SCIGRIP's SG300. The demonstrations will take place twice daily at 11:00 and 15.00 on the 14th, 15th and 16th on MVP's stand in Hall 5A/ Booth U42.

-ENDS-

Notes to the Editor:

Technical Interviews at JEC World 2017 - To learn more about the application of adhesive products in high volume marine applications, Thomas Race, Lead Plant Chemist at SCIGRIP, is available for interview.

Commercial Interviews at JEC World 2017 - Tim Johnson, SCIGRIP's European Sales and Marketing Manager and John Reeves, SCIGRIP's President, would welcome the opportunity to discuss the company's activities and ambitions in Europe and around the globe.

Please email kate@100percentmarketing.com to arrange a meeting with any of the above contacts.
